

Ri believe in making sustainable products that last a long time and all components are designed to be exchanged fairly and easily so the units last many years.

We specialise in high quality, affordable, secure delivery storage. These cabinets are versatile and are used for many applications. Options include modular shelving and/or hooks.

Our handwashing station has been developed to meet the need for outdoors, handwashing facilities that can be secured when not in use.

**Cabinet dimensions:** Height 1790mm x Width 1030mm x Depth 675mm

**Colours available:** Red, green, blue & grey

**Specification;**

- Material:** 1.2mm galvanised steel to EN10346:2015 DX51D+Z275 .
- Finish:** Cleaned and iron phosphate etched, coated with D2000 architectural quality powder paint.
- Fixings:** Stainless steel rivets.
- Locks:** Custom "T" handle, quarter turn cam lock. Radial pin lock with four high security keys, We keep a record of your key number and can supply spares. When key is inserted a handle pops out to help opening but reduces protrusion when locked. Cabinet can only be locked when a key is inserted.
- Hinges:** Full length piano hinges, zinc plated with stainless steel pins.
- Safety:** All Ri cabinets have front opening doors to facilitate easy, safe access.
- Security:** A locking bar with multiple locking tags securely meshes the door to the cabinet body. The door has a full length hinge and is protected against leverage by studs that close into the cabinet door. The cabinet has folded flanges all the way around the door opening.
- Installation:** All necessary fixings are supplied, with full instructions. Cabinets can be fitted to a wall or the ground simply and safely using basic tools. We also supply levelling bolts to overcome the cabinet being pushed or pulled out of shape by unsquared walls.
- Fire & water:** Cabinets are all Steel and so suitable for use as fire-proof cabinets. They are water resistant to IP44 and warranted for 5 years against rust perforation.
- Storage:** Shelf with removeable slats fitted above sink for storage of consumables. Max weight to be stored 50kgs spread over shelves. Provision for mounting paper dispenser and disposal unit.

**Drainage options:**

1. Directly Into 3 x 25 litre plastic containers stored beneath the sink which can be slid on to a wheeled skid/sack trucks for emptying. On/off tap for each container. Containers are an optional extra.
2. Drain can be connected to spigot on preferred side so that a hose can be taken to nearest outside drain.
3. Sink waste outlet can be run back to nearest inside sink waste. (Simple instructions available but you might prefer to engage a plumber)

**Sink:** Sink made from 5mm acrylic capped polypropylene.  
Hot and cold water is connected to nearest sink via plastic push fit pipe and fittings. Simply isolate supply, disconnect lower tap connector and tighten in new fitting which is supplied with isolating valve, and run pipe through to back of cabinet. (Supply is taken after any water temperature control system). Single mixer tap supplied Sink can be fitted to height required (prior to dispatch).

**Bolt:** The door can be bolted to the ground to prevent slamming.

**Disclaimer:** In severe or freezing weather conditions, users should satisfy themselves the unit is safe to use.  
If the system is left for long periods, we recommend turning off the water supply to the cabinet and flushing the system in accordance with your water safety procedures.

The Ri Handwashing Station is supposed to be used under adult supervision and it should be noted that the water temperature will be the same or less than the sink it is connected to. Water connections should be made a competent person.

**Warranty:** 5 years against rust penetration providing the cabinet has been maintained in good working order.  
All other terms subject to our standard terms and conditions (available on request).
